Published quarterly by the Institute of Mathematical Statistics in March, June, September and December at Baltimore, Maryland.

INSTITUTE OF MATHEMATICAL STATISTICS

General Office: Department of Mathematics, Michigan State College, East Lansing, Michigan
K. J. Arnold, Secretary-Treasurer

This address should be used for all communications concerning membership, subscriptions, changes of address, back numbers, etc., but *not* for editorial correspondence. Changes in mailing address which are to become effective for a given issue should be reported to the Secretary on or before the 15th of the month preceding the month of that issue.

Editorial Office: Department of Mathematical Statistics, Columbia University, New York 27, New York
T. W. Anderson, Editor

After December 31, 1952, all editorial correspondence should be directed to the Editor for 1953–55, E. L. Lehmann, Statistical Laboratory, University of California, Berkeley 4, California. A manuscript should be typewritten, double-spaced with wide margins, and the original copy should be submitted (preferably with one additional copy). Footnotes should be reduced to an absolute minimum. Figures should be professionally drawn twice the size they are to be printed. Authors are requested to keep in mind typographical difficulties of complicated mathematical formulae.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers furnished at cost.

Subscription Price: $12 per year in the U. S. and Canada; $10 elsewhere. Single issues $3.50. Back numbers are available at $12 per volume or $3.50 per issue.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

CONTENTS OF VOLUME 23

ARTICLES

ANDERSON, T. W., AND D. A. DARLING. Asymptotic Theory of Certain "Goodness of Fit" Criteria Based on Stochastic Processes 193–212

BAHADUR, RAGHU RAJ, AND LEO A. GOODMAN. Impartial Decision Rules and Sufficient Statistics 553–562

BAKER, G. A. Uniformity Field Trials when Differences in Fertility Levels of Subplots Are Not Included in Experimental Error 289–293

BOSE, R. C., AND K. A. BUSH. Orthogonal Arrays of Strength Two and Three 508–524

BOSE, R. C., AND W. S. CONNOR. Combinatorial Properties of Group Divisible Incomplete Block Designs 367–383

BRADLEY, RALPH ALLAN. Corrections for Nonnormality in the Use of the Two-Sample t- and F-Tests at High Significance Levels 103–113

BUSH, K. A. A Generalization of a Theorem Due to MacNeish 293–295

BUSH, K. A. Orthogonal Arrays of Index Unity 426–434

BUSH, K. A., AND R. C. BOSE. Orthogonal Arrays of Strength Two and Three 508–524

CHERNOFF, HERMAN. A Measure of Asymptotic Efficiency for Tests of a Hypothesis Based on the Sum of Observations 493–507

CHERNOFF, HERMAN, AND SCHEFFÉ, HENRY. A Generalization of the Neyman-Pearson Fundamental Lemma 213–225

COCHRAN, WILLIAM G. The χ^2 Test of Goodness of Fit 315–345

CONNOR, W. S., JR. On the Structure of Balanced Incomplete Block Designs 57–71

CONNOR, W. S. Some Relations among the Blocks of Symmetrical Group Divisible Designs 602–609

CONNOR, W. S., AND R. C. BOSE. Combinatorial Properties of Group Divisible Incomplete Block Designs 367–383

DARLING, D. A. On a Test for Homogeneity and Extreme Values 450–456

DARLING, D. A., AND T. W. ANDERSON. Asymptotic Theory of Certain "Goodness of Fit" Criteria Based on Stochastic Processes 193–212

DAVID, F. N., AND N. L. JOHNSON. Extension of a Method of Investigating the Properties of Analysis of Variance Tests to the Case of Random and Mixed Models 594–601

DONSKER, MONROE D. Justification and Extension of Doob's Heuristic Approach to the Kolmogorov-Smirnov Theorems 277–281

DRION, E. F. Some Distribution-free Tests for the Difference between Two Empirical Cumulative Distribution Functions 563–574
